

GET TO KNOW SERPTOPIA, OUR IN-HOUSE AI AND MACHINE LEARNING SOFTWARE

Advanced SEO solutions based on viralisation signals

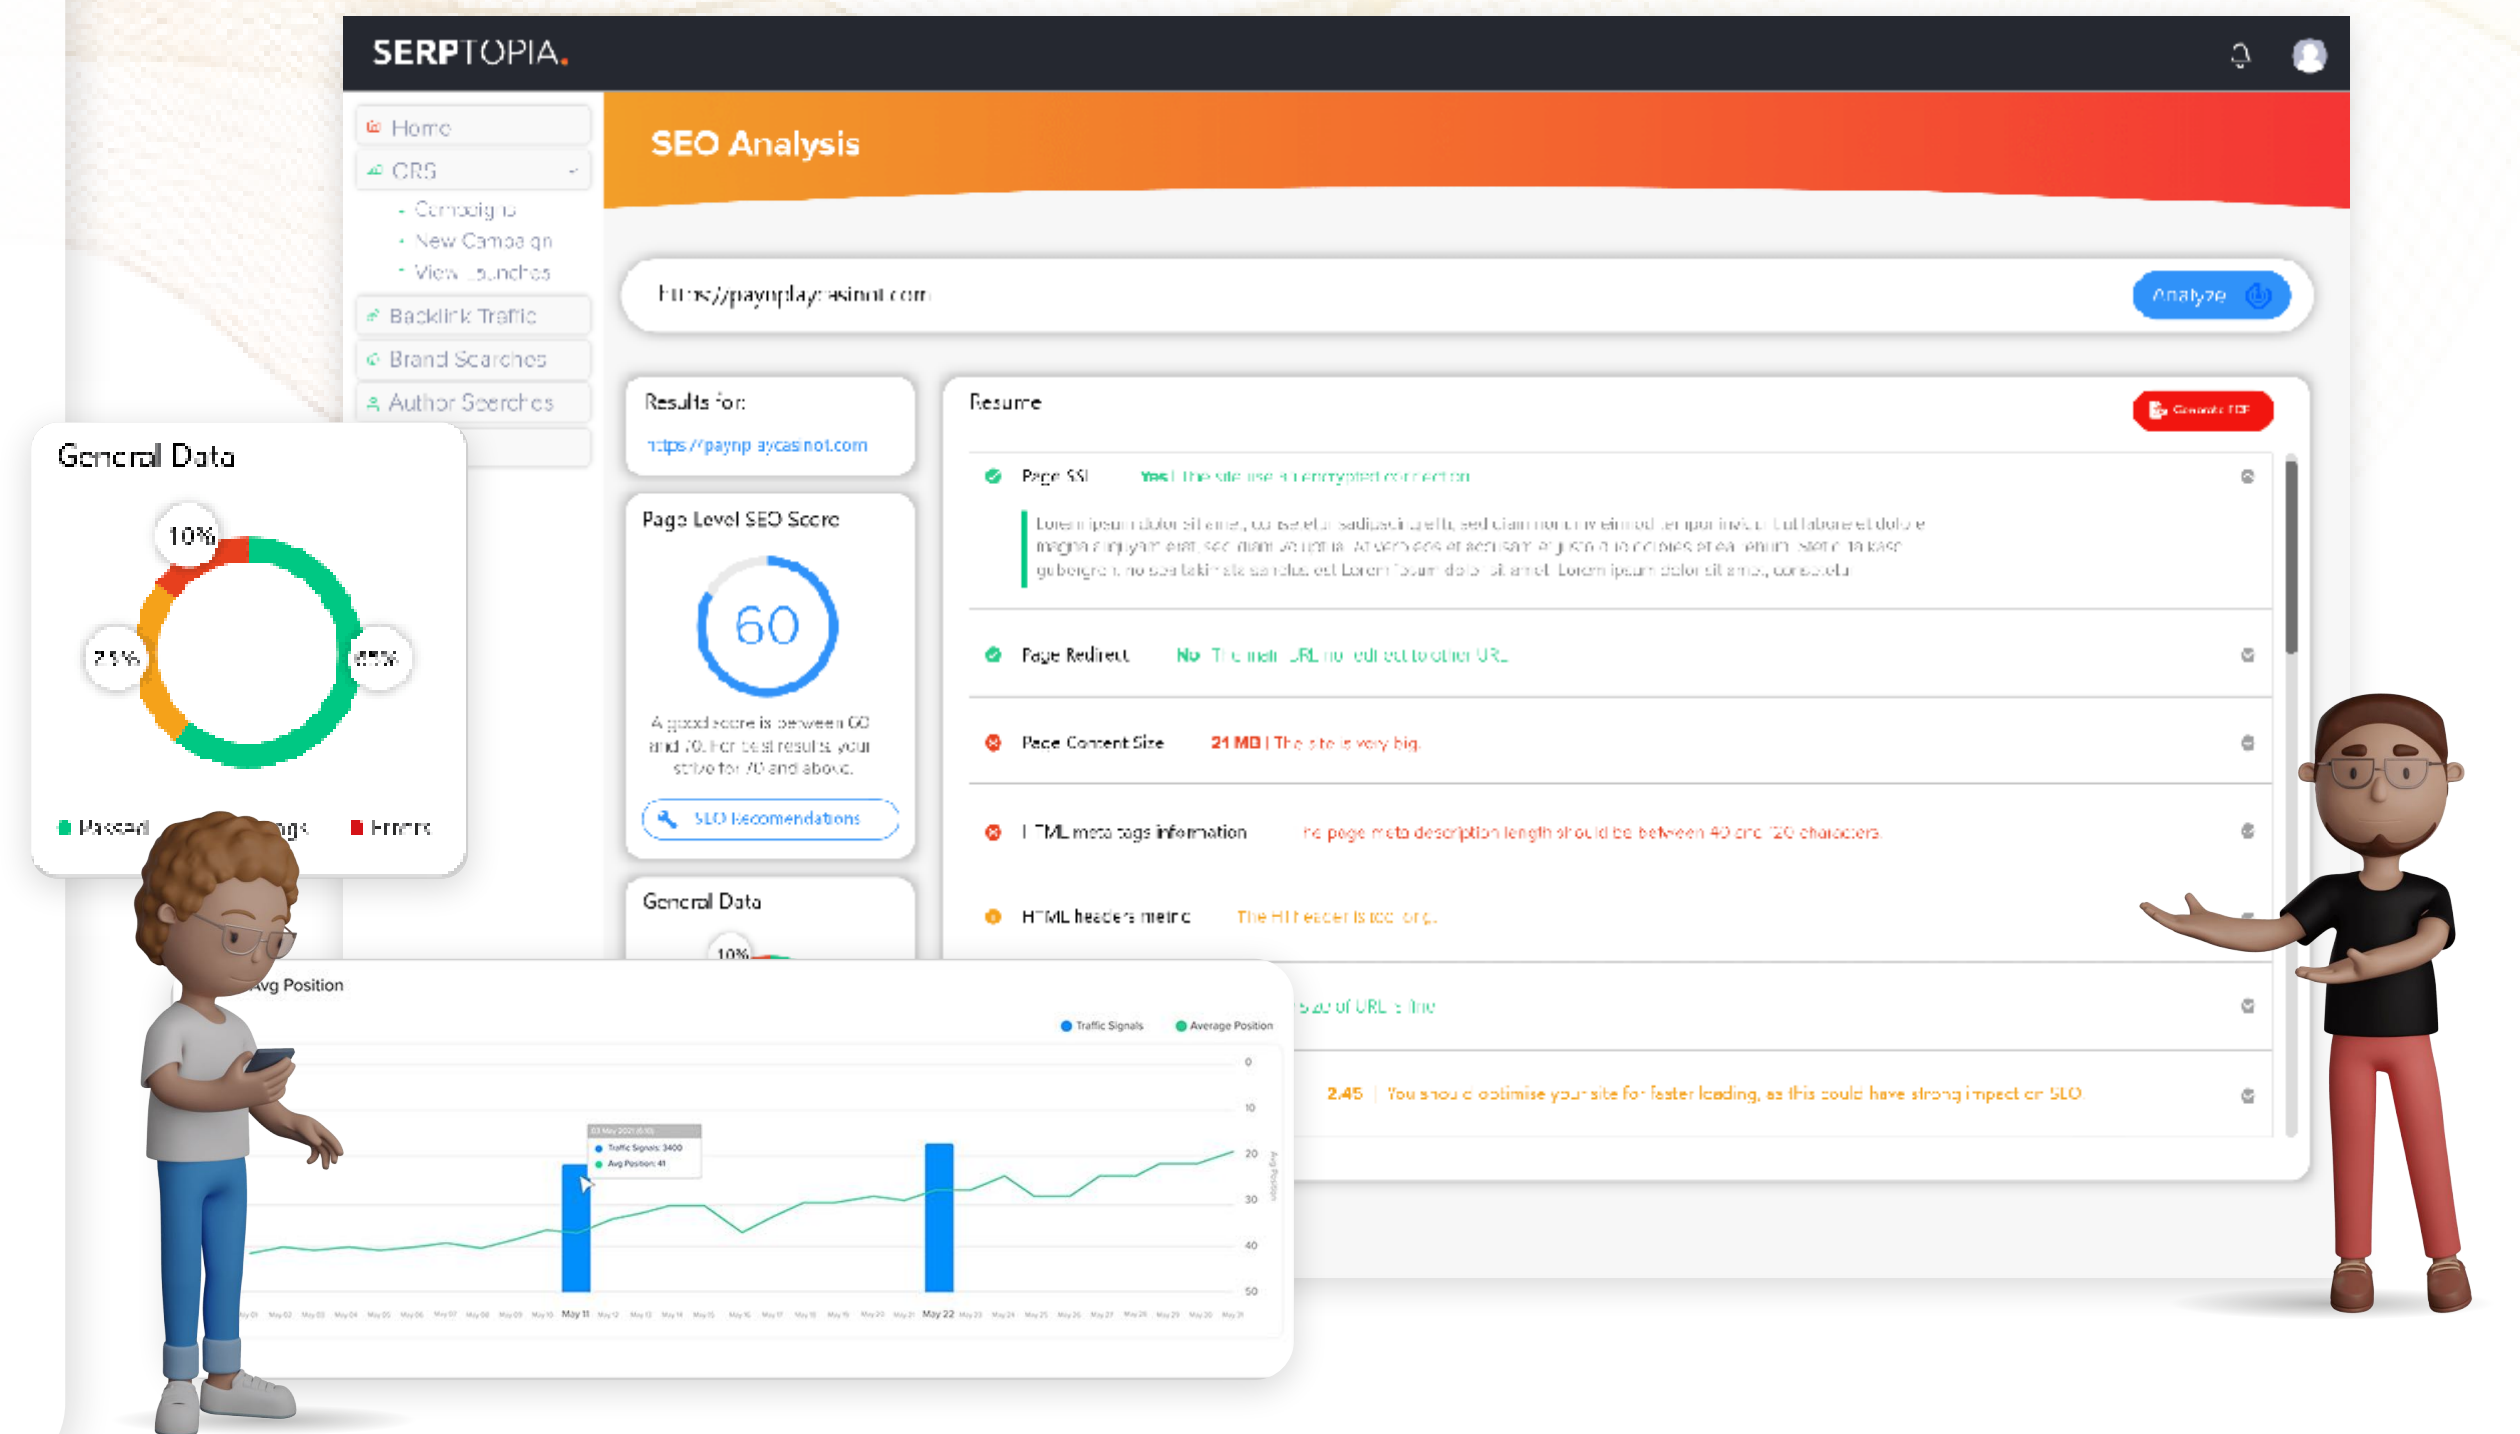

What is SERPTOPIA?

Our own exclusive traffic optimization software.

A technology that combines Artificial Intelligence and Machine Learning at the service of the most innovative, cutting-edge SEO techniques, allowing brands to use the most effective methods possible.

This enables the improvement of organic positioning in your target countries because its various functionalities allow you to carry out organic positioning campaigns tailored to each client's needs.

It is a one-of-a-kind tool that enables international ranking in search engine results for websites by sending ORS signals, which are critical to the success and profitability of any digital business.

What are the benefits of **SERPTOPIA**?

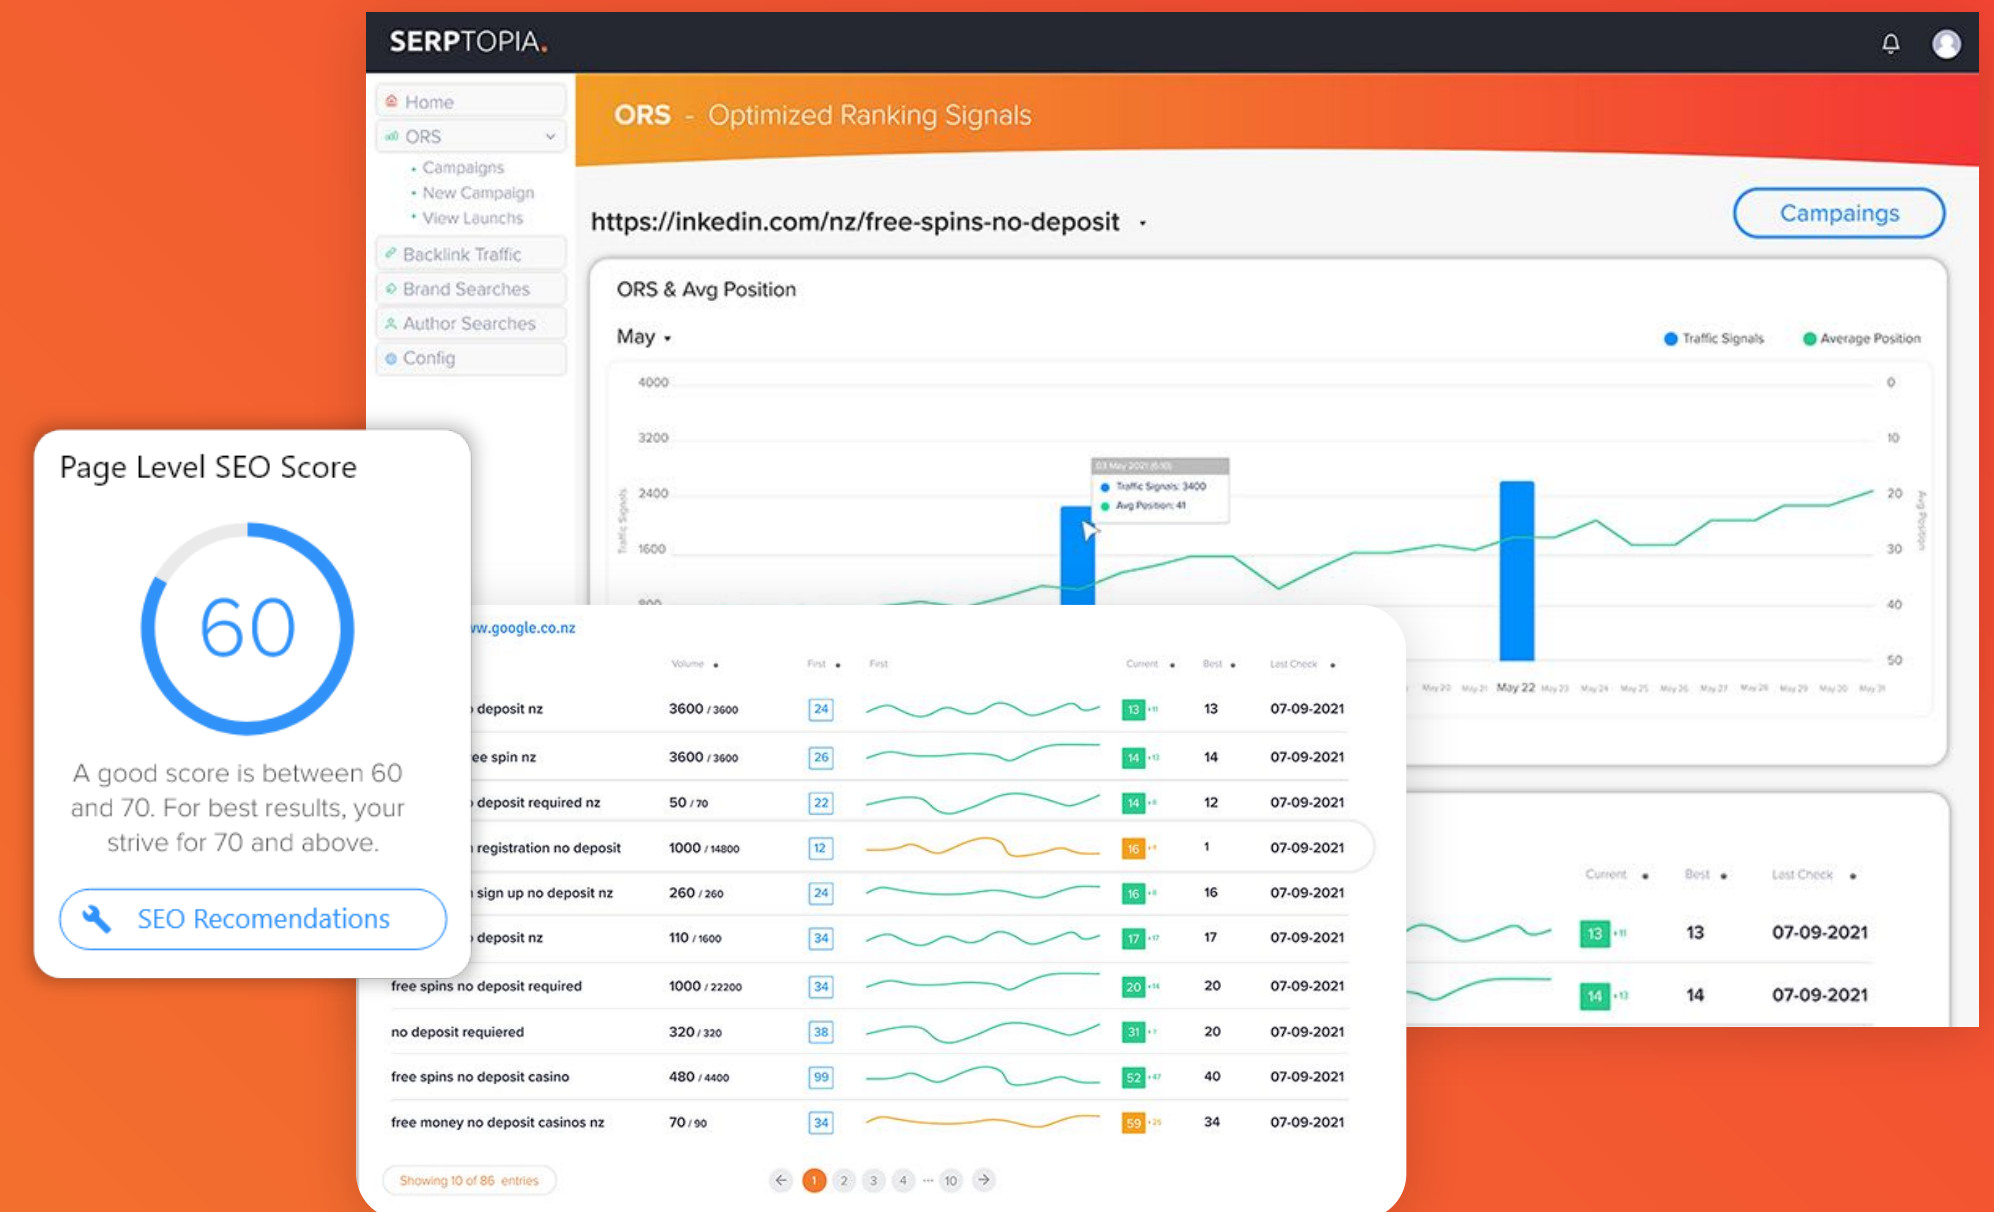

Although the final result is dependent on the behavior of each URL and the unique characteristics of each project, the following are some of the advantages that **SERPTOPIA** has provided to customers who have already used it in their business strategy:

- Organic traffic optimization for the brand.
- Detection of URL-generated signals in order to trigger the positive responses desired by the algorithm for better positioning.
- Providing these ranking signals that are appropriate for any country and improving SEO performance on SERPs in any geographical area.
- Generating and submitting accurate ranking signals to Google, such as interaction, user experience, or strategic links.
- Preparation of monthly and weekly reports on completed actions, which can be accessed via the client's own control panel.
- Access to all data required to monitor the strategies that have been implemented.
- It allows you to stay one step ahead of the game and make the right decisions.

Discover Why Traffic Can Make A Difference

Once you activate your package, This is how traffic benefits you.

Can I use SERPTOPIA? Do I really need this service?

It makes no difference whether you have just begun your project or have been on the Internet for years; if you have reached us, it is because you need to rank your site on the first page of search results and have not yet discovered an efficient way to do so.

We designed SERPTOPIA based on our SEO Lab's years of experience, expertise and testing so that any website can capitalize on its potential and reap benefits in a short period of time. We use it on a daily basis to work with brands of any scope, regardless of their size or economic budget.

If you wish to quickly climb the SERPs of search engines to improve your visibility and increase the natural CTR of your page, this is the tool for you. The best part is that we handle the entire process for you; all you have to do is tell us which URLs you want us to work with and the rest is taken care of.

SERPTOPIA is, unquestionably, the right tool for the stimulation that your website requires. It contains the information, experience, and constant updating supplied by AI and Machine Learning that provides professional results, propelling your online business to a higher level of SEO success.

How does SERPTOPIA work?

Using the tested, innovative methods created by our in-house SEO lab, SERPTOPIA is ready to boost your results in a matter of hours.

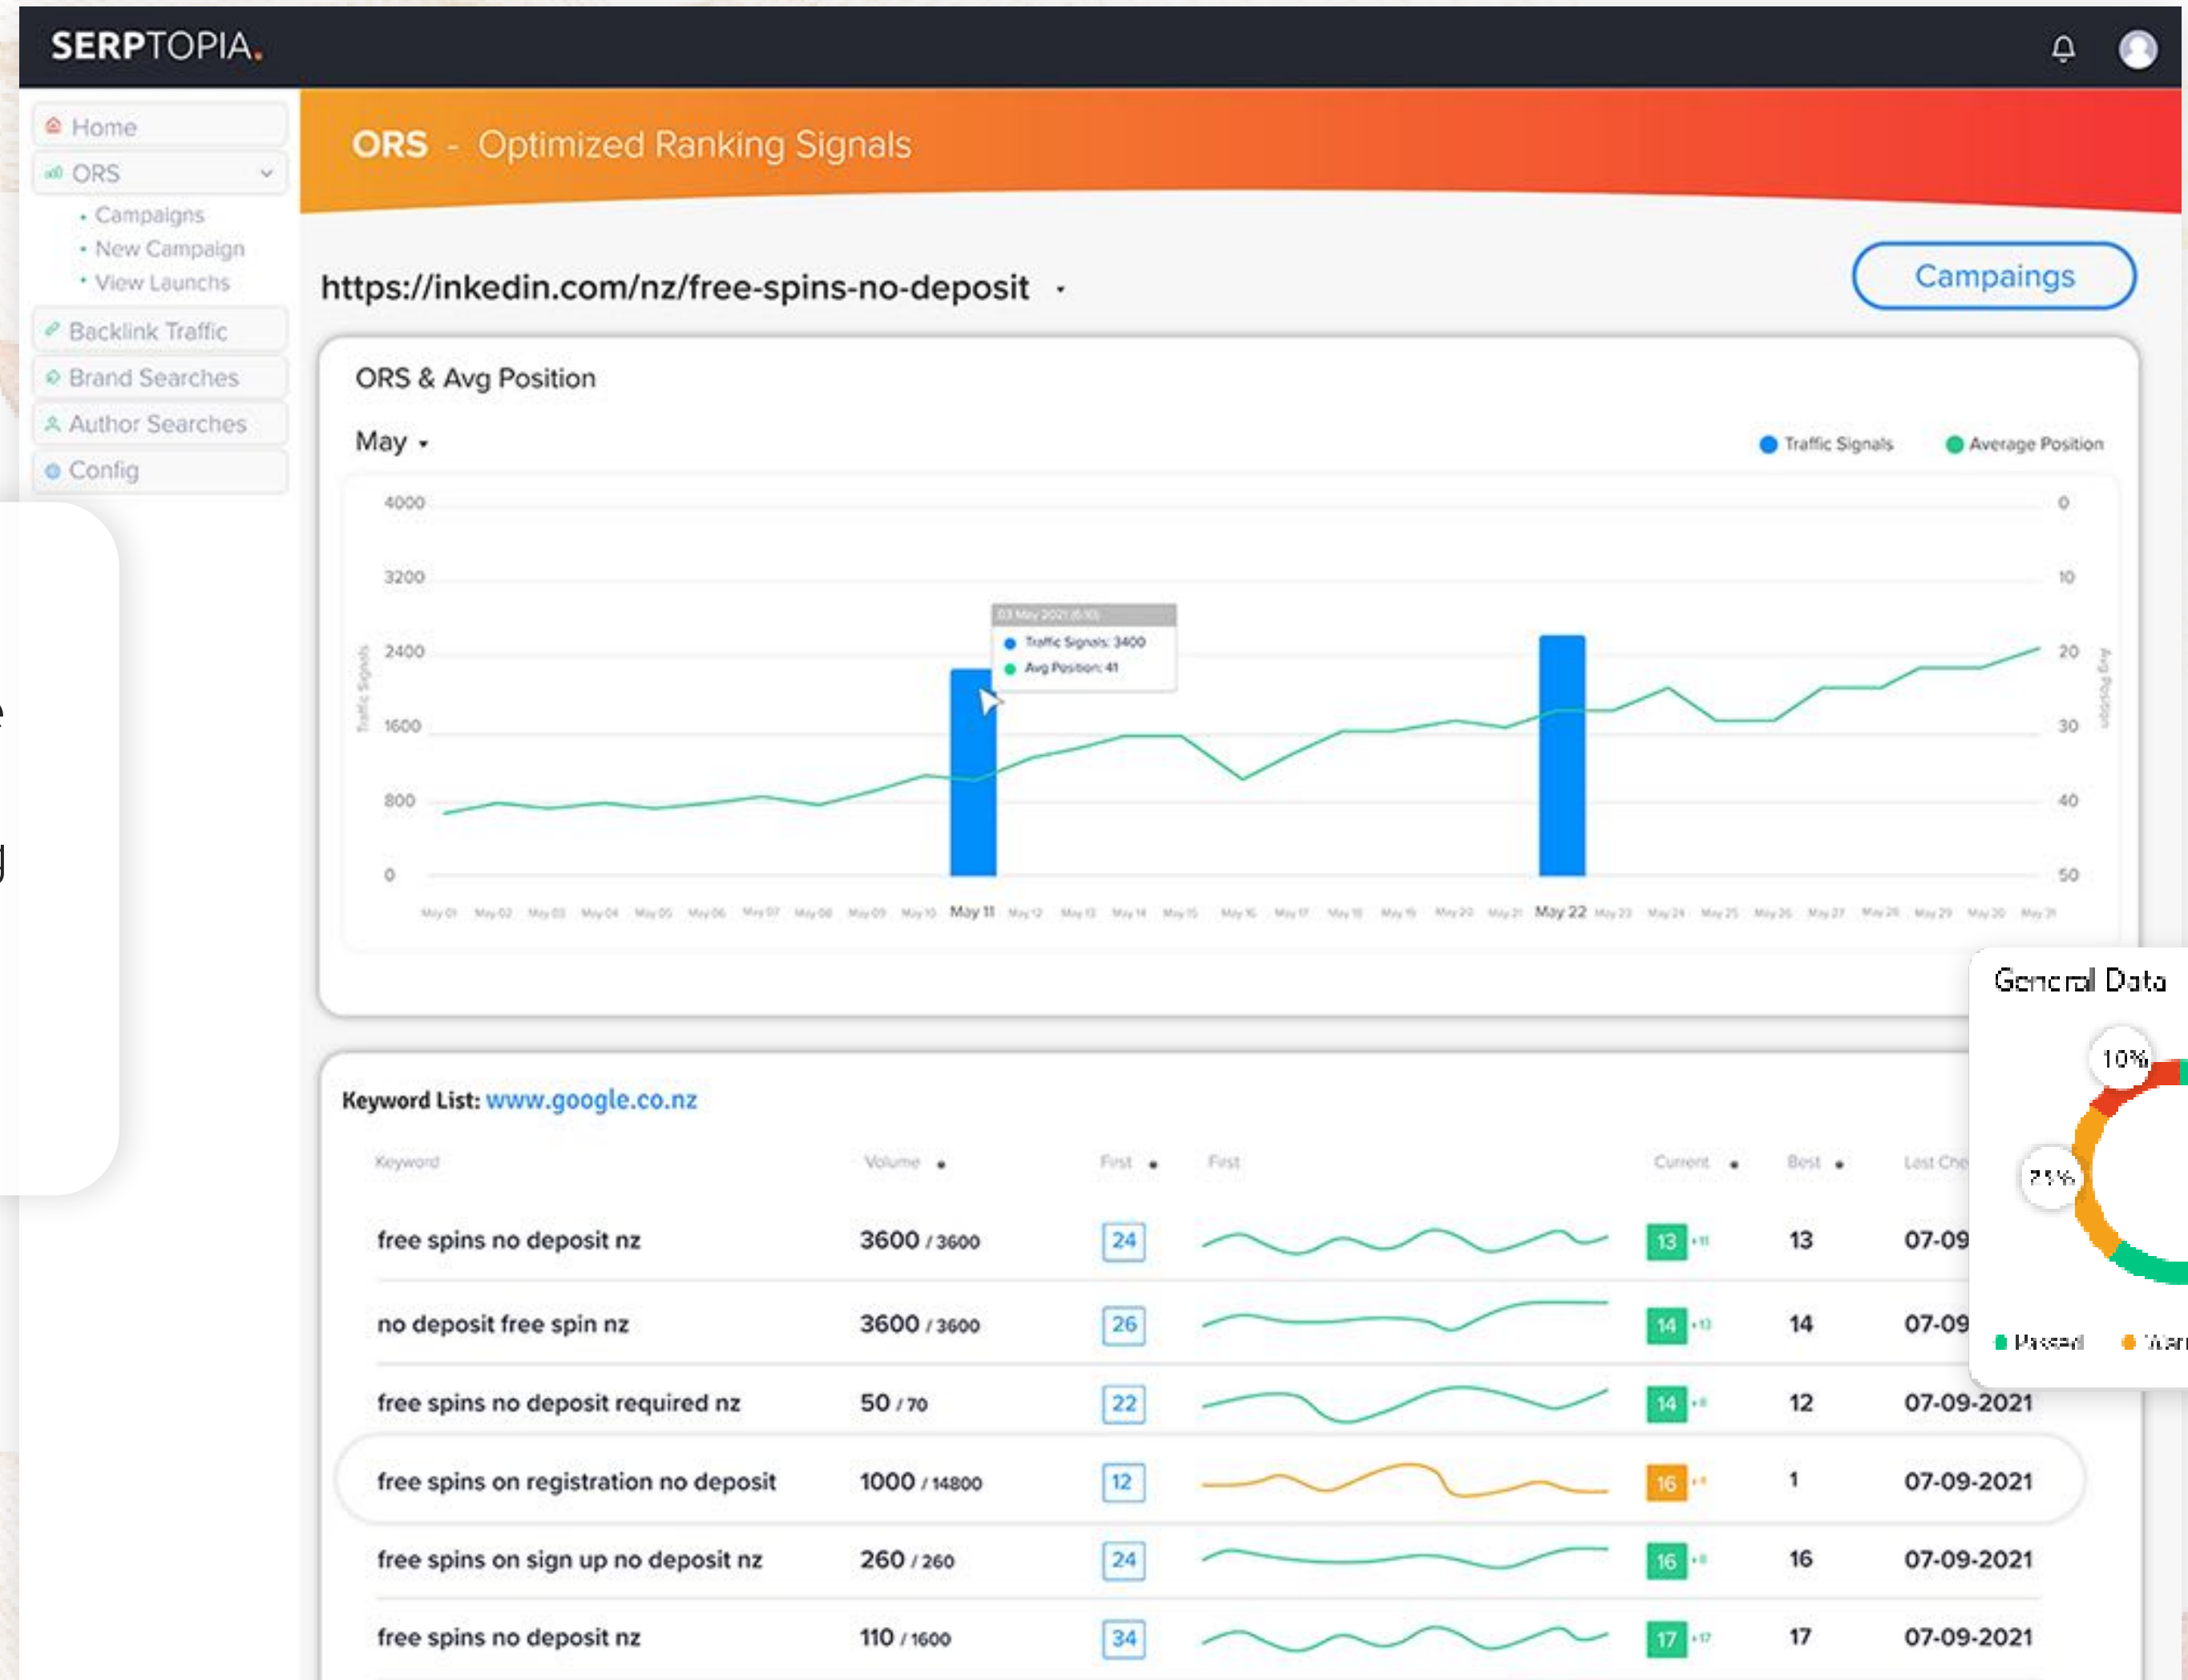

To accomplish this, it uses a combination of Artificial Intelligence and Machine Learning, allowing the software to detect the signals that your URL must generate in order to rank according to search engine algorithms such as Google's.

But that's not all; in addition to identifying signals, it can generate them precisely and send them to obtain an increase in the ranking of results in a matter of hours. Interaction, user experience, real targeted traffic, and strategic links are the keys to internationalizing any Internet project.

We provide experienced and multilingual SEO teams to perform a customized SEO analysis as well as a complete website review. They will upload your URL to SERPTOPIA in order to obtain the necessary data and maximize the various types of traffic and viralization that will help your site rank higher.

How long does it take to get results?

SERPTOPIA, like any other SEO positioning process, takes time to produce results because it is dependent on the characteristics of each project. However, in general, and after applying the appropriate ranking signals, you can see how you can climb positions using this tool in a matter of hours.

What are the risks associated with **SERPTOPIA**?

This will send many positive signals to Google since the backlink all of a sudden has a real purpose, and is actually driving people through it to your site. As a result, Google's algorithm will pick up on all of these signals, and your website will gradually rise in the Rankings.

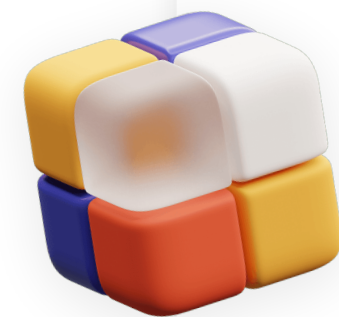

All our products are first tested out in our SEO lab over a long period of time, before they are made available to the public. After such a lasting, meticulous testing time, we can affirm without a shadow of doubt that traffic is one of the main game changers in the current SEO panorama.

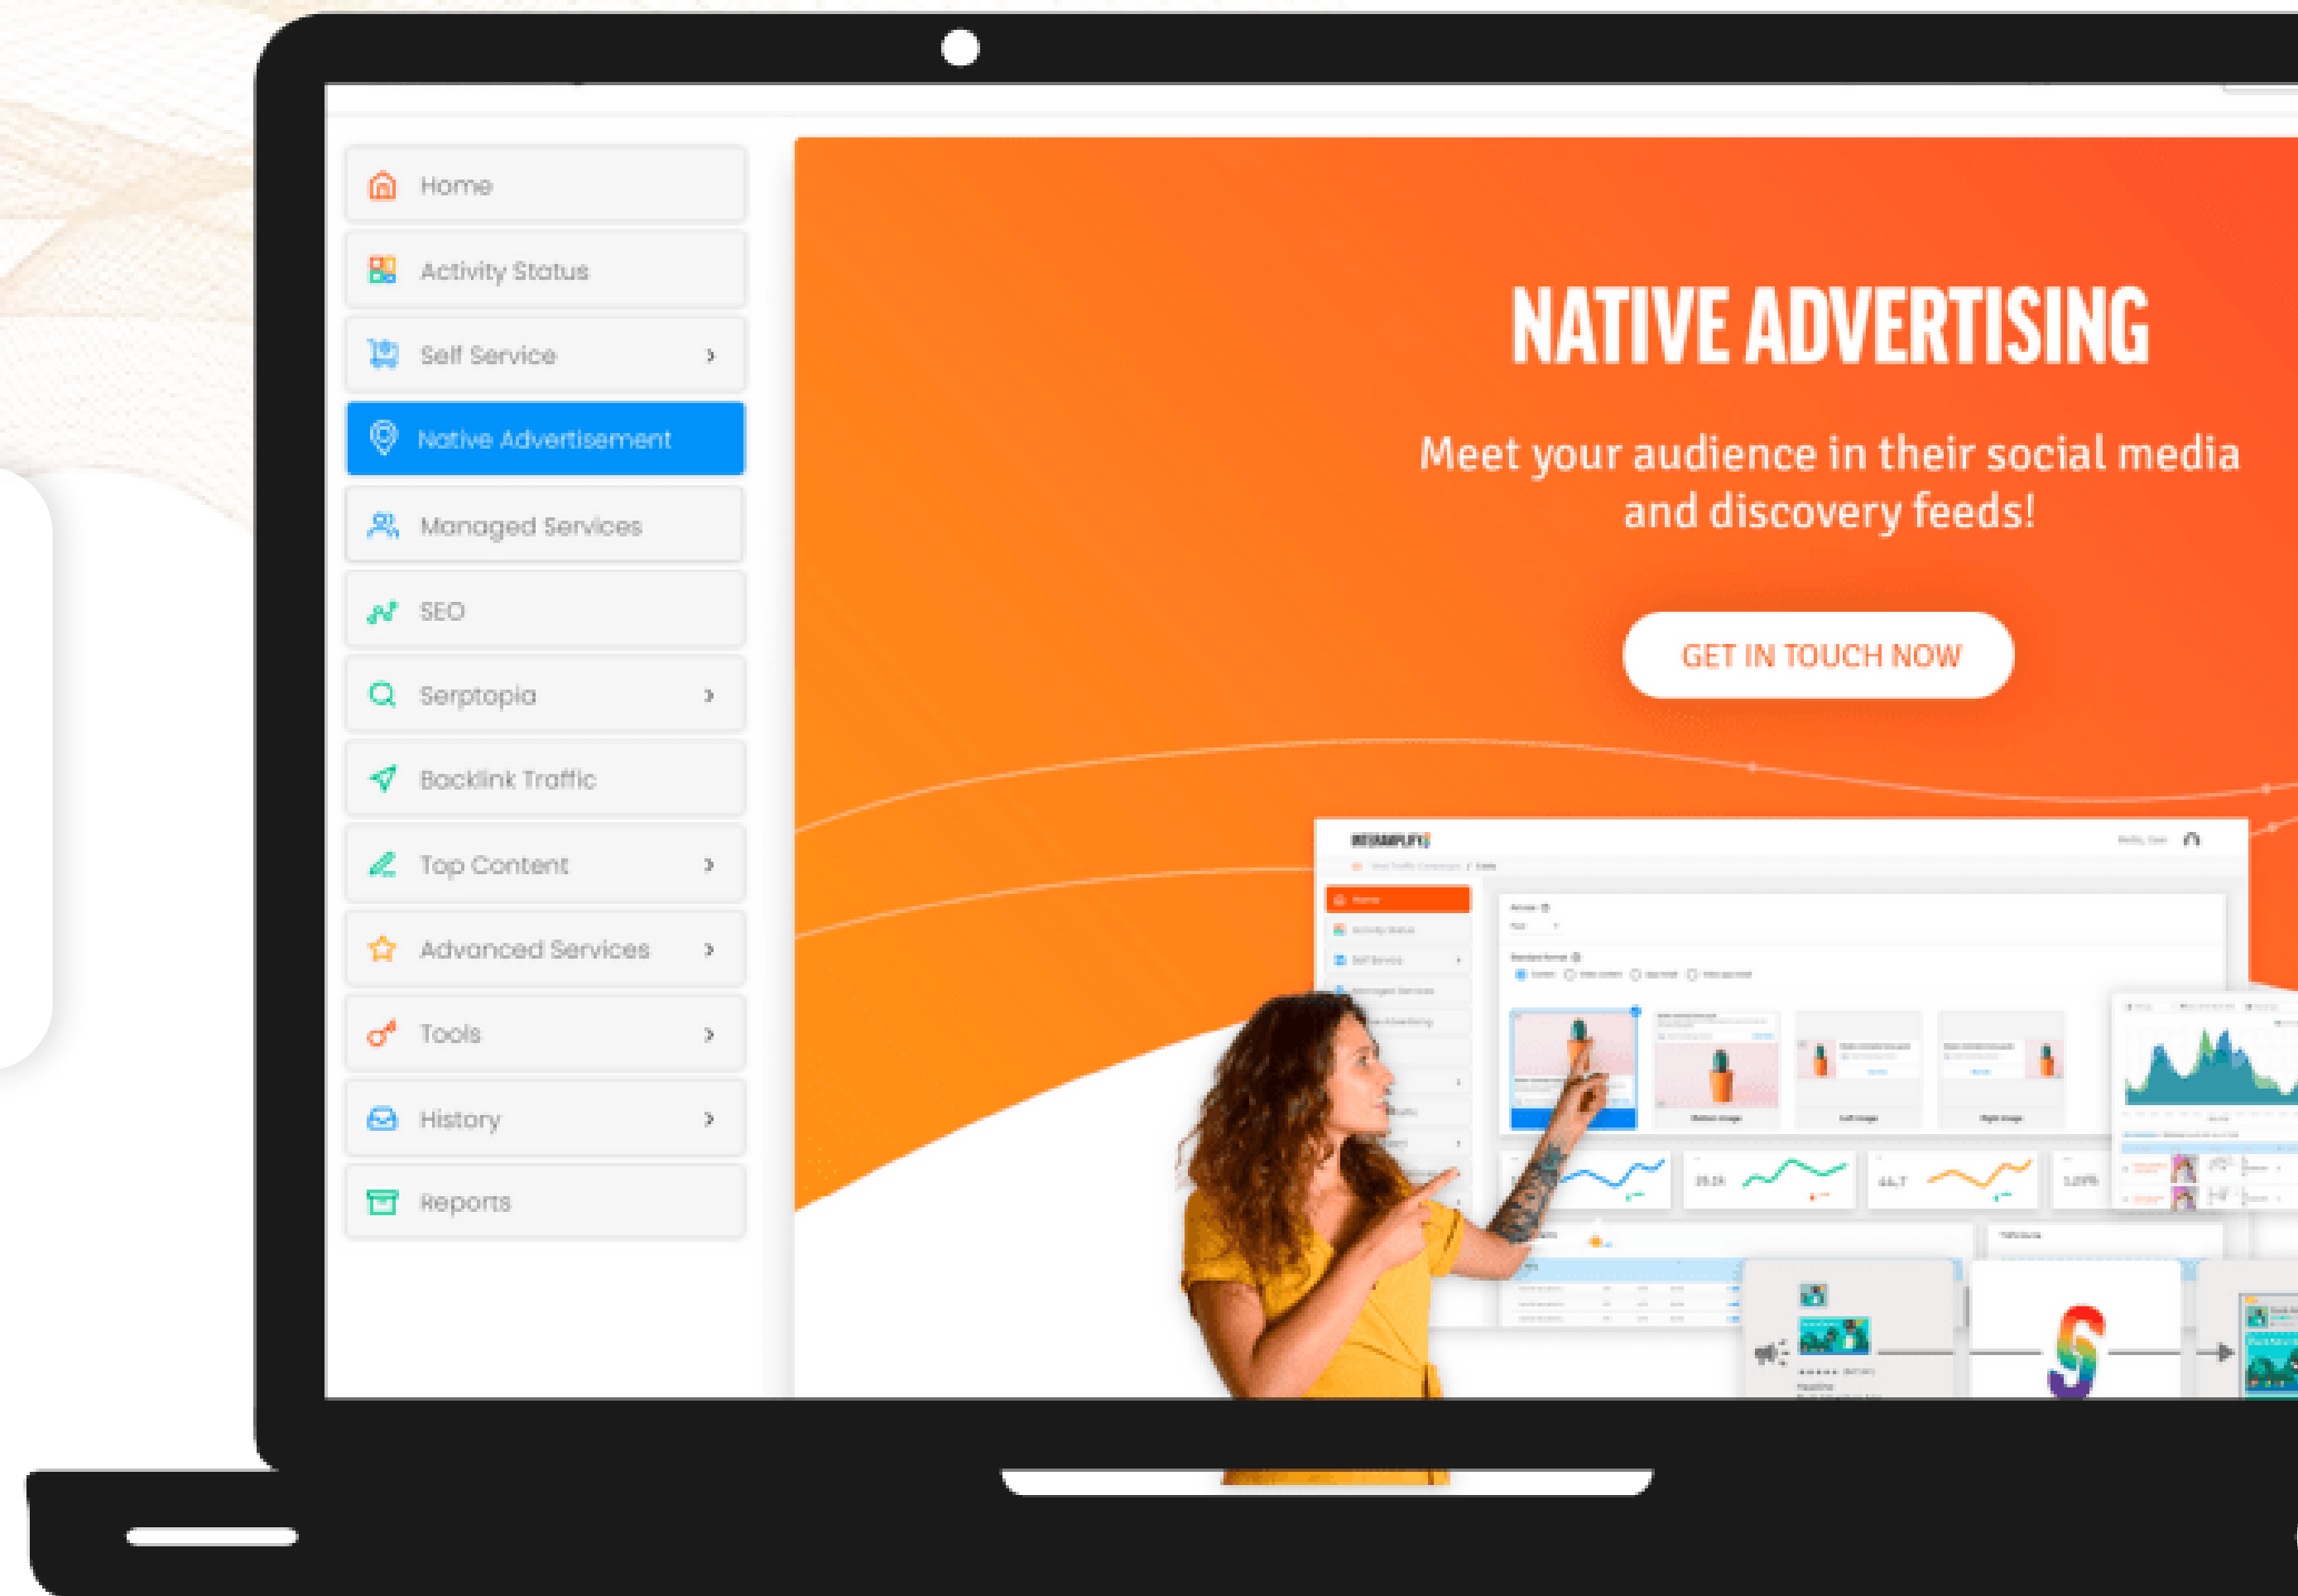

And the best part about this is that Google will never penalize traffic in any way. Our traffic, which behaves flawlessly on the page, will always be interpreted positively.

Services performed with **SERPTOPIA**

SERPTOPIA allows you to run any SEO campaign based on viralization signals. Interamplify specializes in the implementation of ORS strategies and author or branded search services.

What is Backlink Traffic Service?

Our backlink traffic is a service aimed at multiplying the effect of any backlink that your project already has. We ensure that users search in Google for the title of the article containing your backlink, click on it afterwards and navigate to your website.

This will send many positive signals to Google since the backlink all of a sudden has a real purpose, and is actually driving people through it to your site. As a result, Google's algorithm will pick up on all of these signals, and your website will gradually rise in the rankings.

What is Author Searches Service?

Author searches are a crucial component of Google's EAT algorithm. This service is for you if you are looking to rank pages for which Google detects the authority of the author writing the information because they affect the user's economy or health. You will be able to get online searches for your author's name, as well as for two more keyword combinations: your writer's name + your brand or website, and your website or website + your writer's name.
